

Breeder Hacks – The Best Mopping solution for Disinfecting >> COST EFFECTIVE!!

1. We use a **Power Mop, the spraying kind**; many varieties are available at the store.
2. If you didn't know this, you can turn and pull (at the same time) the refill solution bottle to be able to add your own solution to it.
3. We use reusable *microfiber* mop pads the more condensed the material, the better the coverage. We try and recycle by using minimal plastic-based paper products in our program. Basically, avoiding anything that can be shredded and ingested by a young puppy and it's better for the environment.
4. See the **Breeder Hacks – Parvo, Coccidia, Worms, and Giardia Oh My** document for the hypocaloric acid solution we put into the power mop refill bottles. Kills all germs and disinfects. We have 13 dogs, and little of puppies on the floor at least once or twice a year and have never had any lasting issues with sicknesses or reinfection since using this homemade *cost-effective* solution.
