

Breeder Hacks – Urine & Poo Odor Elimination 100% – COST EFFECTIVE AND SAFE!

1. After over a year of trying and making different products, this is genuinely the ONLY one that works from our experiences. You can order this produce easily on Amazon for a reasonable price.

2. We place these in spray bottles. When a pup poos or pees on a rug or carpeted area, the order of cleaning is as follows:
 - a. Completely soak up all the pee and clean the poo.
 - b. Spray generously over the area and slightly outside of it.
 - c. Wear gloves and massage the carpet with your fingers to work the product in.

- d. Leave it set for 3 minutes (for fresh pee/poo) and 10 (for old pee/poo) Then completely soak up the product. And wipe vigorously with a towel or paper towel. Once it is dry, you won't smell a hint of pee or poo!
3. It is also safe to use on most fabric surfaces, such as sofas and covers. It is natural and pet safe.
4. We also started using this similar product of which can be used for porous surfaces and hard surfaces. It is also great to use for places where your males may be marking outdoors (or indoors). Definitely give both products a try. They work great for us (someone who has 12 dogs and breeds puppies!!!!) and our house smell fabulous!
